Art Unit: 3644

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-52 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. All references to being activated by the receiver is considered to be new matter and is conflict with the original disclosure, ie, page 5 line 11; page 6 line 30 and page 7 line8.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 as understood are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dougherty (5539624).

Dougherty shows the fiber optic cable 47 and light goes outward from the refueling hose, see figure 7.

Art Unit: 3644

1. Claims 22-23,26,29,30,33,36,47,48,52 as understood are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Strasser et al (6257750).

See col 3 lines 35+.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 22-52 as understood are rejected under 35 U.S.C. 103(a) as being unpatentable over Dougherty (5539624) in view of Strasser et al (6257750) and Newman (4633376).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the hose of Dougherty with additions illumination means such as electrolum., phosphor, chemilum., ultraviolet, all of which are well known means for illumination of devices as shown by Strasser et al and Newman.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
